

Special Issue on Ecosystem, Environment and Climate

Change in Agriculture

Call for Papers

The implications of climate change for agriculture and food are global concerns. The country depends on an agricultural system which has evolved over thousands of years to intensively exploit environmental conditions. The pressures on the resource base are accentuated by the prospect of climate change.. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Ecosystem, Environment and Climate Change in Agriculture**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Ecosystem, Environment and Climate Change in Agriculture**. In this special issue, potential topics include, but are not limited to:

- Climate change related to agriculture, soil and plants
- Interactions between agriculture, ecosystems, environment, and climate change
- Sustainable and efficient use of resources, the optimization of agricultural processes
- Environmental impact assessment and mitigation in agriculture
- Greenhouse gas mitigation in agriculture
- Occurrence, fate and behavior of pesticides in soil, water and air
- Agricultural environment monitoring
- New avenues for agriculture adaptation to climate change

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Ecosystem, Environment and Climate Change in Agriculture**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 24th, 2021
Publication Date	February 2022
