

Special Issue on Fisheries & Aquaculture

Call for Papers

Fisheries are social, biological and geographical objects involved in producing fish for human consumption. They are usually united by a common geographical area, catch technique and/or target species, and fisheries science is the study of factors affecting catch and stock sustainability. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **fisheries & aquaculture** .

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **fisheries & aquaculture**. In this special issue, potential topics include, but are not limited to:

- Research in sustainable fisheries
- Fisheries in salt, brackish and freshwater systems
- The evolution of applied research in fisheries
- Fisheries and aquaculture
- Environmental aspects of fisheries
- Laboratory and field experimental studies relevant to fisheries

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Fisheries & Aquaculture**” should be selected during your submission.

Special Issue timetable:
