

## Special Issue on Agricultural Systems and Management

### Call for Papers

Agricultural Systems Management is based on an understanding of how equipment and buildings are used with plants and animals and their products. These processes require an understanding of biological sciences to produce and maintain top product quality. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Agricultural Systems and Management**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Agricultural Systems and Management**. In this special issue, potential topics include, but are not limited to:

- Cropping systems: implications on climate and environment
- Intercropping systems for sustainable agriculture
- Enhancing farm-level decision making through innovation
- Farm & agribusiness management
- Greenhouse real-time environment, biological monitoring
- Field precise operation online monitoring
- Agricultural monitoring
- Agricultural systems technology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Agricultural Systems and Management**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	October 25th, 2024
Publication Date	December 2024
