Special Issue on Mathematical Problems in Engineering

Call for Papers

Mathematical Problems in Engineering is the art of applying mathematics to complex real-world problems. It combines mathematical theory, practical engineering and scientific computing to address today's technological challenges.

Engineering mathematicians can be found in an extraordinarily wide range of careers, from designing next generation Formula One cars to working at the cutting edge of robotics, from running their own business creating new autonomous vehicles to developing innovative indices for leading global financial institutions.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Mathematical Problems in Engineering**.

Authors should read over the journal's Author's Guidelines carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue-Mathematical Problems in Engineering**" should be chosen during your submission.

According to the following timetable:

Manuscript Due	February 25, 2013
Publication Date	April, 2013

Editor-in-Chief

Prof.**David L. Carroll**

Wake Forest University, USA
