

## Special Issue on Refrigeration Technology

### Call for Papers

**Refrigeration** is the withdrawal of heat from a chamber to achieve a temperatures lower than ambient temperatures. After heat is withdrawn, it is transferred to a condenser and dissipated to air or water. As an important part of human life and production, it is necessary to continuously improve environmental protection and energy-saving performance of refrigeration technology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **refrigeration technology**. Potential topics include, but are not limited to:

- Refrigeration equipment
- Air conditioning system
- Solar refrigeration technique
- Waste heat refrigeration system
- Magnetic refrigeration
- Thermoacoustic refrigeration
- Geothermal refrigeration
- Laser refrigeration
- Development of refrigeration technology
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Refrigeration Technology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 28th, 2016
Publication Date	March 2016

**Guest Editor:**

For further questions or inquiries

**Scientific Research**  
*Open Access*

**Engineering**

**ISSN Online: 1947-394X**
