

Special Issue on Friction, Wear and Lubrication

Call for Papers

Friction, wear and lubrication between materials in contact are of fundamental importance in many pure and applied sciences. The field is necessarily interdisciplinary and utilizes skills from mechanical engineering, materials science and engineering, chemistry and chemical engineering and so on. The goal of this Special Issue is to provide a platform for scientists worldwide to promote, share, and discuss various new issues and developments in the area of **friction, wear and lubrication**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **friction, wear and lubrication**. Potential topics include, but are not limited to:

- Lubricants and lubrication
- Chemical and physical effects
- Designing for wear life and frictional performance
- Testing and simulation
- Bearing and materials
- Nanotribology
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Friction, Wear and Lubrication**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 29th, 2016
Publication Date	January 2017
