

Special Issue on Transportation Engineering & Technology

Call for Papers

Transportation Engineering or transport engineering is the application of technology and scientific principles to the planning, functional design, operation and management of facilities for any mode of transportation in order to provide for the safe, efficient, rapid, comfortable, convenient, economical, and environmentally compatible movement of people and goods.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **transportation engineering & technology**. Potential topics include, but are not limited to:

- Traffic engineering
- Urban planning
- Highway engineering
- Railway systems engineering
- Port and harbor engineering
- Airport engineering
- Intelligent transportation systems
- Vehicle infrastructure integration

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Transportation Engineering & Technology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 30th, 2018
Publication Date	July 2018
