ETSN is an international refereed journal dedicated to publishing state-of-the-art research in the field of e-health applications in telecommunication systems and networks. The journal focuses on systems, algorithms, and applications of e-health and medical telecommunications. ETSN publishes original research as well as review papers in the following areas:

Biomedical communications

Biomedical sensors and instrumentation

Biomedical signal processing

Body area and sensor networks

Clinical ICT application

Collaborative technologies in e-health and telemedicine systems

Consumer health informatics

E-health and m-health systems

E-health in public health

Grids

Healthcare applications

Healthcare information systems

Healthcare systems and services in transition: e-health, telemedicine and conditions for innovation

Medical informatics

Patient pathways and coordinated care

Prevention and self-management

Security and privacy issues of e-health systems

Wearable sensors and systems

Wireless communications and mobility

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.
