

Special Issue on Geoscience and Future Earth

Call for Papers

The Earth is the only astronomical object known to accommodate life. Humans have been influencing the Earth through different activities and play a key role in dominating many of the Earth's ecosystems with a large human population. As a new international research initiative, Future Earth will develop comprehensive knowledge for responding to global change risks and create transformative opportunities toward future global sustainability. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **geoscience and future earth**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **geoscience and future earth**. In this special issue, potential topics include, but are not limited to:

- Terrestrial ecosystem carbon cycle
- Monitoring of environmental changes
- Development of the earth system model
- Global environmental change
- Develop future earth for promoting social sustainability
- Co-design of implementation plan for future earth
- Geology in 3-D and the evolving future of earth science
- Global change and future earth

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Geoscience and Future Earth**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 5th, 2024
Publication Date	January 2025
