IJCNS is an international refereed journal dedicated to the latest advancement of communications and network technologies. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in these fast moving areas.

Editor-in-Chief

Prof. Boris S. Verkhovsky

New Jersey Institute of Technology, USA

Subject Coverage

This journal invites original research and review papers that address the following issues in wireless communications and networks. Topics of interest include, but are not limited to:

Ad Hoc and Mesh Networks	Network Protocol, QoS and Congestion
Coding, Detection and Modulation	Control
Cognitive Radio	Network Survivability
Communication Networks Architecture Design	Next Generation Network Architectures
Communication Reliability and Privacy	Reconfigurable Networks
Communication Security and Information Assurance	Resource Management
Cooperative Communications	Satellite Communication
Embedded Distributed Systems	Sensor Networks
Global Networks	Simulation and Optimization Tools
Heterogeneous Networking	UWB Technologies
Microprocessor	Wave Propagation and Antenna Design
MIMO and OFDM Technologies	Wireless Personal Communications

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the IJCNS.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
