

Table of Contents

Volume 7 Number 10

October 2019

The Problem of Identifying Possible Signals of Extra-Terrestrial Civilizations in the Framework of the Information-Based Method

B. Menin.....2157

A Three-Dimensional Numerical Model for Predicting the Weld Bead Geometry Characteristics in Laser Overlap Welding of Low Carbon Galvanized Steel

K. Oussaid, A. El Ouafi.....2169

Self-Adaptive Algorithms for the Split Common Fixed Point Problem of the Demimetric Mappings

X. H. Chen, Y. L. Song, J. Y. He, L. P. Gong.....2187

Orbital Stability of Peakons for a Generalized Camassa-Holm Equation

X. H. Lu, A. Y. Chen, T. J. Deng.....2200

Periodic Solution for a Stochastic Predator-Prey Model with Impulses and Holling-II Functional Response

Y. F. Yang, Y. F. Shao, M. W. Li.....2212

The Classical Hall Effect in Multiply-Connected Plane Regions Part II: Spiral Current Streamlines

U. Ausserlechner.....2231

Analysis of a Delayed Stochastic One-Predator Two-Prey Population Model in a Polluted Environment

M. W. Li, Y. F. Shao, Y. F. Yang.....2265

Dynamics of Structurally Inhomogeneous Lamellar and Shell Mechanical Systems. Part 1

M. M. Mirsaidovich, S. I. Ibrokhimovich, T. M. Khudoyberdievich.....2283

Clusters Deposition on Surface an Atomic Scale Study by Computer Simulation Method

A. Rasulov, N. Ibroximov.....2303

Exact Traveling Wave Solutions of Equalwidth Equation

X. L. Tang, H. Z. Liu.....2315

Classification of Blood Species Using Fluorescence Spectroscopy Combined with Deep Learning Method

J. H. Gan, L. H. Zhou, J. Cui, B. Q. Man, X. N. Jia, S. Z. Shi, L. N. Liu.....2324

Global Existence and Large Time Asymptotic Behavior of Strong Solution to the Cauchy Problem of 2D Density-Dependent Boussinesq Equations with Vacuum

M. Liu.....2333

Travel to the Center of Atomic Nuclei

D. Gianni.....2352

Local Strong Solutions for the Cauchy Problem of 2D Density-Dependent Boussinesq Equations with Vacuum

H. F. Wang.....2373

The Simulation and the Calculation of the Shortest Hohmann Transfer Orbit to Mars

Y. F. Wei, Y. K. Zhang.....2384

Exact Topological Soliton Solutions to the Strongly Perturbed Family of Sine-Gordon Type Equations

S. Johnson, E. Zerrad, S. Makrogiannis, J. Ren.....2401

Topics on Solid Angles

L. C. M. Amaral.....2423

Numerical Integration of Forced and Damped Oscillators through a New Multistep Method

M. Cortés-Molina, F. García-Alonso, J. A. Reyes.....2440

The Adomian Decomposition Method for a Type of Fractional Differential Equations

P. Guo.....2459

Dispersive Traveling Wave Solution for Non-Linear Waves Dynamical Models

K. Boateng, W. G. Yang, M. E. Otoo, D. Yaro.....2467

Regularity of Global Attractors for the Kirchhoff Wave Equation

X. Y. Liu, P. Gao.....2481

Modelling of the Abundance of Malaria Mosquitoes Using Poisson Mixed Model

E. Moyo, C. Munachoonga, D. Lubumbe, A. Banda, A. Ngunyi, S. Jere.....2492

Inverse and Saturation Theorems for Some Summation Integral Linear Positive Operators

A. Srivastava, V. K. Singh.....2508

Dynamics of a Nonautonomous Plant Disease Model with General Nonlinear Incidence Rate and Time-Varying Impulse

J. P. Wang, X. Zhang, J. J. Wang, Q. B. Sun.....2518

An Improved Affine-Scaling Interior Point Algorithm for Linear Programming

D. K. Boah, S. B. Twum.....2531

Feature Selection with Non Linear PCA: A Neural Network Approach

C. Gallo, V. Capozzi.....2537
