

Table of Contents

Volume 10 Number 2

February 2022

Electron-Positron Pair Production in Electro-Magnetic Field

S. A. Alkhateeb, A. A. Alshaery, R. A. Aldosary.....237

Path Integral Quantization of Doubly Supersymmetric Model

H. A. Elegla, N. I. Farahat.....245

Two Theorems of Multiple G -Itô Integral under G -Lévy Process

H. Zheng, Y. F. Xin.....254

Test of Ordered Multivariate Discrete Selection Model for Average Life Expectancy

J. W. Liu.....261

Transient Hydromagnetic Stagnation-Point Flow across a Vertical Surface with Partial Slip in a Chemically Reactive Medium

S. Museh, I. Y. Seini.....270

Edge-Transitive Cyclic Covers of Complete Graphs with Prime Power Order

Z. H. Huang, Y. Liu.....289

Forecasting Methods to Reduce Inventory Level in Supply Chain

T. T. Cai, X. S. Li.....301

Numerical Solution of Parabolic in Partial Differential Equations (PDEs) in One and Two Space Variable

M. A. M. Mu'lla, A. M. A. Gaweash, H. Y. I. Bakur.....311

Successful Detection of a Preferred Frame Using Eclipses of Jupiter's Moon Io

S. J. G. Gift.....322

New Exact Traveling Wave Solutions of $(2 + 1)$ -Dimensional Time-Fractional Zoomeron Equation

Z. Y. Zeng, X. H. Liu, Y. Zhu, X. Huang.....333

Positive Solutions for a Class of Quasilinear Schrödinger Equations with Nonlocal Term

P. Liao, R. Ping, S. X. Chen.....347

Global Dynamics of a New Huanglongbing Transmission Model with Quarantine Measures

C. M. Zeng, Y. J. Liu, S. X. Yan, W. Y. Fu.....360

Influence of the Form of Porous Insert in the Flow of a Viscous Liquid in a Plane Pipe	
U. Dalabaev.....	372
An Explicit Formula of the Dirichlet-to-Neumann Map for a Radial Potential in Dimension 3	
F. Ndiaye.....	379
Generalized Trigonometric Power Sums Covering the Full Circle	
H. Jelitto.....	405
Integrability, Multi-Solitary Wave Solutions and Riemann Theta Functions Periodic Wave Solutions of the Newell Equation	
C. M. Fang.....	415
The Method for Optimum Estimation of COVID-19 Variant Type Virus Infection Status Analysis by the Multivariate Analysis Considering the Environmental Variability Impact in Japan	
E. Toma, Y. Kobayashi.....	425
A Numerical Solution of Heat Equation for Several Thermal Diffusivity Using Finite Difference Scheme with Stability Conditions	
W. Z. Loskor, R. Sarkar.....	449
Numerical Scheme for Solving Stochastic Differential Equations with G-Lévy Process	
J. W. Mei, Y. F. Xin.....	466
Numerical Solution of Casson Fluid Flow under Viscous Dissipation and Radiation Phenomenon	
N. Akbar, S. M. Hussain, R. U. Khan.....	475
Comprehensive Automation of Microprocessor Protection Relay Terminals Operated on AC Railways	
V. M. Viktorovich, D. A. Vasilyevich, M. K. Vladimirovich, S. V. Nikolaevich.....	491
Stability and Bifurcation Analysis of a Predator-Prey Model with Michaelis-Menten Type Prey Harvesting	
W. C. Chen.....	504
Toric Realisation of Quantum Systems via Clifford Structures	
M. Bensed, Y. El Maadi.....	527
Angular Decomposition and Sign Solved Propagator of the 2D and 3D Helium Atom Path Integrals	
E. G. Thrapsaniotis.....	538
Periodic, Irrational and Transcendental Numbers in the Factorial Series	
I. Lénárt.....	558

**Ground State Solutions for a Kind of Schrödinger-Poisson System with Upper
Critical Exponential Convolution Term**

Y. L. Tang, Q. F. Zhang.....576

On the Paradox of the Duality of Autoregressive and Moving Average Processes

E. Onyemachi, I. S. Iwueze, E. C. Nwogu.....589
