

## Special Issue on Fuzzy Sets, Systems and Decision Making

### Call for Papers

Engineering Mathematics is a branch of applied mathematics that focuses on the application of mathematical principles and techniques to solve engineering problems. It involves the use of mathematical models, algorithms, and computational methods to analyze and optimize engineering systems, processes, and designs. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Fuzzy Sets, Systems and Decision Making**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Fuzzy Sets, Systems and Decision Making**. In this special issue, potential topics include, but are not limited to:

- Fuzzy sets
- Fuzzy systems
- Fuzzy decision making
- Fuzzy modeling
- Fuzzy algorithms and computing
- Fuzzy mathematics
- Fuzzy optimization

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Fuzzy Sets, Systems and Decision Making**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	October 20th, 2024
Publication Date	December 2024
