

Table of Contents

Volume 5 Number 2

May 2014

Hemin Protects U937 Cells from Oxidative Stress via Glutathione Synthesis

Y. Satoh, K. Oyama, K. Sakurai.....13

Atherogenic Indices and HDL Particle Size as Laboratory Parameters to Evaluate Cardiovascular Risk in the Presence of Dyslipidemia

A. P. C. Santos, M. S. Vieira, D. F. Deus, R. J. B. de Oliveira, A. T. Morikawa, R. Aras, A. M. Atta, F. D. Couto,
R. C. Maranhão, R. D. Couto.....24

A Unique Conformational Behaviour of Glutamine Peptides

M. Baskar, M. Shafique, F. S. Nandel.....33

Non-Local pH Shifts and Shared Changing Angular Velocity Magnetic Fields: Discrete Energies and the Importance of Point Durations

N. Rouleau, T. N. Carniello, M. A. Persinger.....44

Genetic Variation in *Salamandra infraimmaculata* from Different Habitats Using Amplified Fragment Length Polymorphism

G. Degani, T. Goldberg, E. Nevo.....54

Phosphoprotein Phosphatase 1 Isoforms Alpha and Gamma Respond Differently to Prodigiosin Treatment and Present Alternative Kinase Targets in Melanoma Cells

M. Fardilha, J. Figueiredo, M. Espona-Fiedler, J. Felgueiras, L. Korrodi-Gregório, S. L. C. Esteves, S. Rebelo,
O. A. B. da Cruz Silva, E. da Cruz e Silva, R. Pérez-Tómas.....67

Gibbs-Donnan Potential as a Tool for Membrane Vesicles Polarization

M. Iuliia, K. Sergiy, V. Tetyana, S. Oleksandr.....78
