

Special Issue on
Information, Network & Computer Security
Call for Papers

"Information, Network, & Computer Security" is a vital academic field dedicated to safeguarding digital information and infrastructure. It integrates techniques and tools for defending against cyber threats, ensuring data confidentiality, integrity, and availability. Key areas include cybersecurity, encryption, risk assessment, and ethical hacking, alongside the study of protective measures against unauthorized access and data breaches. This discipline is crucial for maintaining the security of computer networks and systems in the face of evolving technological challenges and cyber attacks.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Information, Network & Computer Security**. Potential topics include, but are not limited to:

- Cryptography and encryption
- Quantum information security
- AI and cybersecurity
- Computer and system security
- Data security
- Computer forensics
- Internet of things (IoT) security
- Web and application security
- Network protocols and security
- Cloud security
- Wireless and mobile security
- Data privacy and protection
- Threat intelligence and analysis
- Access control and authentication
- Intrusion detection systems
- Malware analysis and defense
- Secure software development
- Risk assessment and management

Authors should read over the journal's [For Authors](#) carefully before submission.

Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Information, Network & Computer Security**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 7th, 2024
Publication Date	December 2024
