**Journal of Crystallization Process and Technology (JCPT)** is an international, specialized, English-language journal devoted to publication of original contributions concerning with the crystallization process, studies and properties of the crystalline materials.

## Subject Coverage

It is an open-access, peer-reviewed journal describing scientific and technological advances that cover the basic sciences, engineering aspects and applied technology of crystals and crystallization processes:

- Crystals Growth, Design and Properties for Applications in Medical Sciences with Organic and Biological Substances Crystallization; Biomineralization; Opto-Electronics with Semiconductors, Superconductors, Magnetics, Inorganic and Inorganic-Organic Hybrid Materials Crystallization.
- Characterization by Physical and Chemical Methods; Apparatus, Instrumentation and Techniques for Crystal Growth, and Purification Methods.
- Crystallization as Bulk or Thin Films; Crystallization in Polymers, Liquid Crystals, Crystallization in Sol-Gel Glasses and Viscous Media.
- Crystallization Processes Including among Others Chemical Vapor Deposition, Hydrothermal, Organic, Solvent and Solvent-Free Processes.

The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books, covering both the experimental and theoretical aspects including physical, chemical, and biological phenomena and processes related to the design, growth, and application of crystalline materials. Contributions can concern also with the fundamental concepts of crystal growth and the understanding of the relationship between crystal growth conditions and resulting properties of the crystal:

- Intermolecular Interactions in the Solid State.
- Modeling of Crystal Growth Processes.
- Nucleation Theory.
- Transport Phenomena in Crystal Growth.

Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
