

Special Issue on Cryptography and Network Security

Call for Papers

Cryptography is the practice and study of techniques for secure communication in the presence of third parties called adversaries. More generally, cryptography is about constructing and analyzing protocols that prevent third parties or the public from reading private messages; various aspects in information security such as data confidentiality, data integrity, authentication, and non-repudiation are central to modern cryptography

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Cryptography and Network Security**. Potential topics include, but are not limited to:

- Cryptography and coding theory
- Information security
- Data encryption
- Secure communication and transposition techniques
- Construction and analysis of protocols
- Authentication technologies
- Encryption and decryption
- Cryptographic algorithms and techniques
- Public key infrastructure
- Key management
- Confidentiality and integrity
- Digital rights management
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Cryptography and Network Security**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 26th, 2021
Publication Date	June 2021

Scientific Research
Open Access

Journal of Information Security

ISSN Online: 2153-1242
