

Special Issue on
Energy Security and Renewable Techniques

Call for Papers

Energy is essential to our society to ensure our quality of life and to underpin all other elements of our economy. The environmental benefits of renewable energy are well known, it is gathered from self-renewing resources such as the sun, wind, water, earth, and plants. The economic, social, environmental, and technical dimensions highlighted above reinforce the case for renewable energy in the context of already fragile global economy.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **energy security and renewable techniques**. Potential topics include, but are not limited to:

- Energy supply, demand and security
- Renewable and sustainable energy
- Renewable energy resources and technologies
- Environmental impact and sustainability
- Applications and services
- Opportunities and challenges

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Energy Security and Renewable Techniques**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 30th, 2016
Publication Date	February 2017
