## Editor in Chief

**Prof. Arun Kumar Pati** Harish-Chandra Research Institute (HRI), Allahabad, India

## Editorial Board

**Prof. Nicolas Gisin** University of Geneva, Switzerland

**Prof. L. B. Levitin** Boston University, USA

**Prof. Sandu Popescu** University of Bristol, UK

**Prof. A. K. Rajagopal** Inspire Institute, USA

**Prof. T. Toffoli** Boston University, USA

**Prof. V. Vedral** University of Oxford, UK

## Editorial Assistant

**Yana Yi** Scientific Research Publishing, USA Email: [jqis@scirp.org](mailto:jqis@scirp.org)

## TABLE OF CONTENTS

**Volume 2    Number 1**

**March 2012**

**Causality and Reversibility in Irreversible Time: Book Review**

M. L. Arushanov.....1

**Quantum Mechanics and the Philosophy of Language: Reconsideration of Traditional Philosophies**

S. Ishikawa.....2

**Quantum Steganography Embedded Any Secret Text without Changing the Content of Cover Data**

T. Mihara.....10

## **Journal Information**

### **SUBSCRIPTIONS**

The *Journal of Quantum Information Science* (Online at Scientific Research Publishing, [www.SciRP.org](http://www.SciRP.org)) is published quarterly by Scientific Research Publishing, Inc., USA.

#### **Subscription rates:**

Print: \$39 per issue.

To subscribe, please contact Journals Subscriptions Department, E-mail: [sub@scirp.org](mailto:sub@scirp.org)

### **SERVICES**

#### **Advertisements**

Advertisement Sales Department, E-mail: [service@scirp.org](mailto:service@scirp.org)

#### **Reprints (minimum quantity 100 copies)**

Reprints Co-ordinator, Scientific Research Publishing, Inc., USA.

E-mail: [sub@scirp.org](mailto:sub@scirp.org)

## Subject Coverage

The field of Quantum Information Science is the most challenging and hot topic among all branches of science. This field is also quite interdisciplinary in character, and people from quantum theory, computer science, mathematics, information theory, condensed matter physics, many-body physics and many more have been actively involved to understand implications of quantum mechanics in information processing. JQIS aims to publish research papers in the following areas:

- Dynamical Maps: Study of open quantum system; Complete positivity; Beyond completely positive maps; Quantum dynamics as resources.
- Experimental Implementation: Implementation of quantum algorithms and information processing protocols with NMR devices; Ion traps; Neutral atoms; Solid state devices; Quantum optical methods; Cavity QEDs and any other innovative proposals.
- Geometric Quantum Computation: Computation by geometrical phases; Mixed state geometric phases; Abelian; Non-abelian and topological phases; Phase holonomies under unitary evolution and CP maps.
- Quantum Computation: Quantum algorithms; Quantum complexity; Simulation of complex systems; Quantum memory; Quantum mechanical automata; Quantum universal constructors; Quantum algorithms and computations with continuous variables.
- Quantum Cryptography: Application of quantum mechanics in communication; quantum key distribution; Quantum bit commitment; Different kind of attacks on cryptographic protocols.
- Quantum Entanglement: Bell's inequality and non-locality issues; Quantification of entanglement; Measures of entanglement; Entanglement as resource; Detection of entanglement; Conversion of entanglement; Theory of majorisation.
- Quantum Information Processing Protocols: Teleportation; Entanglement swapping; Remote state preparation; Remote state measurement; Entanglement concentration and purification methods; Telecloning; Information concentration.
- Quantum Information Theory: Fundamental issues in quantum information; Quantum cloning; Quantum deleting; Quantum coding; Channel capacities; Data compression; Quantum error-correction; Decoherence; Optimal quantum measurements.
- Relativistic Quantum Information Theory: Entanglement and relativity; Sharing of reference frames in information theory and relativity; Various concepts of quantum information theory in relativity.

JQIS will consider original Letters, Research articles, and short Reviews in the above and related areas. Before publication in JQIS all the submitted papers will be peer-reviewed by the experts in the field. We can plan to bring out JQIS as a monthly journal, hence all the authors can take advantage of rapid publications of their results in this fast growing field. Being an open access journal we can hope to reach a much wider readership compared to other journals in the related areas.
