TABLE OF CONTENTS

Volume 6 Number 5 May 2013

Deploying Safety-Critical Applications on Complex Avionics Hardware Architectures
R. Hilbrich, L. Dieudonné……229
Framework of User Participation for the Interface Design in the SaaS Layer
Z. Jaramillo, M. Vargas-Lombardo……236
Customized Standalone GIS-Based Tool for Ground Water Quality Assessment: Gaza Strip as a Case Study
F. K. J. Rabah, Al-M. B. E. Budwan, S. M. Ghabayen……243
Higher-Order Statistics for Automatic Weld Defect Detection
S. Saber, G. I. Selim……251
Sharing of NKN Facilities in Static Step Topology under Distributed Environment
T. Zaidi, V. Saxena……259
Source-to-Source Refactoring and Elimination of Global Variables in C Programs
H. Sankaranarayanan, P. A. Kulkarni……264
Mixed Music Analysis with Extended Specmurt
D. Nishimura, T. Nakashika, T. Takiguchi, Y. Ariki……274
A Hybrid Evaluation Framework of CMM and COBIT for Improving the Software Development Quality
A. Amid, S. Moradi……280
The Design and Development of a Multi-Lingual Braille System Output Device with Audio Enhancement
M. J. Owayjan, T. Z. Wehbe, E. Y. B. Daher, O. A. Ayoub……289

Call for Papers

Journal of Software Engineering and Applications (JSEA)

ISSN 1945-3116 (print) ISSN 1945-3124 (online)

www.scirp.org/journal/jsea

JSEA publishes four categories of original technical articles: papers, communications, reviews, and discussions. Papers are well-documented final reports of research projects. Communications are shorter and contain noteworthy items of technical interest or ideas required rapid publication. Reviews are synoptic papers on a subject of general interest, with ample literature references, and written for readers with widely varying background. Discussions on published reports, with author rebuttals, form the fourth category of JSEA publications.

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

Automated Software Design and Synthesis
Automated Software Specification
Component-Based Software Engineering
Computer-Supported Cooperative Work
Formal Methods
Knowledge Acquisition
Object-Oriented Technology
Patterns and Frameworks
Process and Workflow Management
Program Understanding Issues
Programming Languages and Software Engineering
Reflection and Metadata Approaches
Reliability and Fault Tolerance
Requirements Engineering
Reverse Engineering
Software Architecture
Software Design Methods
Software Domain Modeling and Meta-Modeling
Software Engineering Decision Support
Software Engineering Education
Software Maintenance and Evolution
Software Process Modeling
Software Quality
Software Reuse
Software Testing
Tutoring, Help, Documentation Systems

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the JSEA.

Notes for Prospective Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- •High visibility for maximum global exposure with open access publishing model
- •Rigorous peer review of research papers
- •Prompt faster publication with less cost
- •Guaranteed targeted, multidisciplinary audience
