**Journal of Transportation Technologies (JTTs)** is an international refereed journal dedicated to the latest advancement of transportation technologies. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in the areas.

## Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- |  |  |
|--|--|
| Advanced Driver Assistance Systems                     | Maritime Transport Management                                |
| Advanced Emergency Management Systems (AEMS)           | Metro-Rail Transportation                                    |
| Advanced Materials for Transportation Vehicles         | Mobile Terminal Displays                                     |
| Advanced Traffic Management Systems (ATMS)             | Navigation Technology  |
| Automated Baggage Handling and Screening Systems       | On-Board Diagnosis   |
| Automated People Movers                                | Operational Control Centres                                  |
| Automatic Vehicle Location and Tracking                | Pedestrian and Vehicle Detection Technologies                |
| Automotive Software Architecture                       | Planning and Scheduling Software Packages                    |
| Bus Transit Systems                                    | Powertrain Management  |
| Collision Avoidance Systems                            | Railway Tunnels and Tunneling                                |
| Command Control Centres                                | Railways Management  |
| Communication, Navigation, Surveillance Systems        | Smart Card Reader  |
| Computer-Aided Dispatch                                | Socio-Economical Effect of Environmental Friendly Mobility   |
| Devices to Enhance Pedestrian and Bicyclist Safety     | Sustainable Transport Safety Management                      |
| Dynamic Traffic Signal Control                         | Testing Methodology  |
| Electronic Fare Collection                             | Traffic Control Devices                                      |
| Flight Information Display Systems                     | Traffic Psychology   |
| Health and Wellness in Transportation Industry         | Traffic Signal Priority System                               |
| Incident Reporting Packages                            | Transport Management   |
| Intelligent Security Systems                           | Transport Safety   |
| Intelligent Transportation Systems and Traffic Control | Travelers' in-Vehicle and Out-of-Vehicle Information Systems |
| Intelligent Vehicles                                   | V2I/V2V Communication  |
| ITS Architecture                                       | Variable Message Signing                                     |
| ITS as Decision Support System                         | Vehicle Navigation System                                    |
| Location Based Services                                | Vehicle-to-Roadside Communication (VRC)                      |
| Marine Communication and Navigation Engineering        | Weigh-in-Motion (WIM)  |

The page limit for final papers is at least six double-column pages in 10 point Times New Roman font. However, we are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
