

## Special Issue on Transportation Science and Technology

### Call for Papers

Transportation refers to the movement of goods and people from one place to another. According to different transportation methods, transportation technology is divided into ocean, road, railway, air, pipeline, etc. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Transportation Science and Technology**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Transportation Science and Technology**. Potential topics include, but are not limited to:

- Intelligent transportation system and smart technologies
- Electric transportation technology
- Transportation facilities
- Transportation and logistics
- Economics and urban transportation
- Sustainable transport safety management
- Transportation and automobile design
- Transportation systems management and operations strategies
- Analysis of transportation user behavior
- Demands for transportation and logistics services

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Transportation Science and Technology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 8th, 2021
Publication Date	April 2021
