

Special Issue on Traffic Information and Safety

Call for Papers

Traffic safety means that people should drive and walk safely in accordance with the provisions of traffic regulations when carrying out activities and playing on the road to avoid personal injury or death or property damage. The focus of traffic accident prevention is to enhance the driver's safety awareness and driving skills, while strengthening the protection of the driver himself. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Traffic Information and Safety**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Traffic Information and Safety**. Potential topics include, but are not limited to:

- Traffic psychology and driver behavior
- Child traffic safety
- Transport facilities design and evaluation
- Traffic safety and road management
- Traffic information system
- Traffic safety education
- Traffic information management and collection
- Traffic behavior analysis and modeling

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Traffic Information and Safety**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 20th, 2021
Publication Date	April 2021
