

Special Issue on International Trade

Call for Papers

International Trade is the exchange of goods and services between countries. Almost every kind of product can be found on the international market, trading globally gives consumers and countries the opportunity to be exposed to goods and services not available in their own countries. International trade not only results in increased efficiency but also encouraging the opportunity of foreign direct investment, which is the amount of money that individuals invest into foreign companies and other assets. In this way, economies can therefore grow more efficiently and can more easily become competitive economic participants. Increasing international trade gives rise to a world economy, in which prices, or supply and demand, affect and are affected by global events. The goal of this special issue is to provide a platform for professors and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **international trade**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **international trade**. The topics to be covered by this special issue include, but are not limited to:

- Increased efficiency of trading globally
- Benefits of trading globally
- Comparative advantage and absolute advantage
- Foreign direct investment
- Import and export
- Free trade Vs. Protectionism

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue - *International Trade***" should be chosen during your submission.
