<http://www.scirp.org/journal/mrc>

Modern Research in Catalysis (MRC) is an open access journal published quarterly. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in all aspects of Catalyst.

Editorial Board

Dr. Apurba Bhattacharya	Texas A&M Kingsville, USA
Dr. Ivan Kurtovic	The New Zealand Institute for Plant & Food Research Limited, New Zealand
Dr. Zeeshan Nawaz	LEADS, Lahore, Pakistan

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous peer-review process. Accepted papers will immediately appear online followed by printed in hard copy. The areas covered by Modern Research in Catalysis (MRC) include but are not limited to the following fields:

- Applications of catalysts
- Catalytic function to fundamental chemical processes at surfaces and in metal complexes
- Catalytic reactions
- Computational catalysis
- Electrocatalysis
- Enzymatic catalysis and spectroscopic methods for structural characterization
- Homogeneous catalysis
- Heterogeneous catalysis
- Novel concepts in surface chemistry
- Organocatalysis
- Supported organometallic catalysis
- Synthesis and catalytic function of novel inorganic solids and complexes
- Surface chemistry
- Significant of catalysis
- Theoretical methods of the catalytic processes

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
