

Special Issue on Natural Resource Economics

Call for Papers

Natural Resource Economics is a transdisciplinary field of academic research within economics that aims to address the connections and interdependence between human economies and natural ecosystems. Natural resource economics deals with the supply, demand, and allocation of the Earth's natural resources. One main objective of natural resource economics is to better understand the role of natural resources in the economy in order to develop more sustainable methods of managing those resources to ensure their availability to future generations. Resource economists study interactions between economic and natural systems, with the goal of developing a sustainable and efficient economy.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **natural resource economics**. Potential topics include, but are not limited to:

- Natural resources supply, demand and allocation
- Natural resources extraction and technology
- Human economics and natural ecosystems
- Natural resource inputs
- Natural resource models
- Economic policy and resource management
- Trend towards of resources

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Natural Resource Economics**” should be chosen during your submission.

According to the following timetable:

| | |
|---------------------|---------------------|
| Submission Deadline | November 27th, 2014 |
| Publication Date | January 2015 |
