

## Special Issue on Wetlands Management

### Call for Papers

**Wetlands** are ecological landscapes with abundant biodiversity and serve as one of living environments of human beings, playing important ecological functions in regulating floods, purifying water quality and modulating climate, which have significant effects on climate change, economic development at the local, regional or global levels.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **wetlands management**. Potential topics include, but are not limited to:

- Storage Reservoirs and flood Protection
- Shoreline stabilisation and storm protection
- Water purification
- Constructed wetlands
- Wetlands biodiversity and wetlands products
- Wetlands and climate change
- Wetland conservation and sustainable development

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Wetlands Management**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 23rd, 2015
Publication Date	June 2015
