
Special Issue on Forest Economics and Management

Call for Papers

Forest Economics is the application of economic principles to a wide range of subjects extending from management of the various forest resources through the processing, marketing and consumption of forest products. Management can be based on conservation, economics, or a mixture of the two.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **forest economics and management**. Potential topics include, but are not limited to:

- Silviculture and forest regulation
- Biodiversity and resources value
- Climate change and natural disaster
- Timber management and international trade
- Forest policy analysis and assessments
- Economics of ecosystem services
- Sustainable forest management

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Forest Economics and Management**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 21st, 2015
Publication Date	July 2015
