

Special Issue on Natural Resource Management

Call for Papers

Natural resource management refers to the management of various biological and non-biological natural resources in order to achieve the most appropriate use, protection and control of natural resources. The purpose of managing natural resources is to reduce the degradation of natural resources and achieve sustainable use. With the increasing pressure on land, water, fishery and forest resources protection, it is of great importance to strengthen the management of natural resources.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **natural resource management**. Potential topics include, but are not limited to:

- Water resources management
- Biodiversity conservation
- Forest management
- Mining management
- Land use planning and management
- Natural assessment and monitoring
- Resource management and sustainability

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Natural Resource Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 30th, 2018
Publication Date	March 2018
