

Special Issue on Wildlife Management and Conservation

Call for Papers

Wildlife conservation is the practice of protecting endangered plant and animal species and their habitats. Among the goals of wildlife conservation are to ensure that nature will be around for future generations to enjoy and to recognize the importance of wildlife and wilderness lands to humans. Many nations have government agencies dedicated to wildlife conservation, which help to implement policies designed to protect wildlife. Numerous independent nonprofit organizations also promote various wildlife conservation causes. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Wildlife Management and Conservation**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Wildlife Management and Conservation**. In this special issue, potential topics include, but are not limited to:

- Major threats to wildlife
- North American model of wildlife conservation
- Wildlife as an international resource
- Non-government involvement
- Sustainable utilization of species and ecosystems
- Priorities for national action

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Wildlife Management and Conservation**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 8th, 2019
Publication Date	July 2019
