Special Issue on

Natural Resource Management and Protection

Call for Papers

Natural resource management is an interdisciplinary field of study that considers the physical, biological, economic and social aspects of handling natural resources. It involves putting resources to their best use for human purposes in addition to preserving natural systems. Natural resource managers' duties include overseeing workers, analyzing data, developing environmental plans and policies in accordance with state and federal laws and negotiating land and resource use contracts with landowners and governments. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Natural Resource Management and Protection**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Natural Resource Management and Protection**. In this special issue, potential topics include, but are not limited to:

- Community-based natural resource management
- Wildlife conservation
- Wildlife protection laws
- Adaptive management
- Integrated natural resource management
- Biodiversity conservation
- Allocation of natural resources
- Land management
- Environment and natural resources policy

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Natural Resource Management and Protection***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 18th, 2020
Publication Date	August 2020
