

TABLE OF CONTENTS

Volume 3, Number 4B, November 2013

Action of protoporphyrin-IX (PP-IX) in the lifespan of *Drosophila melanogaster* deficient in endogenous antioxidants, Sod and Cat

E. Pimentel, L. M. Vidal, M. P. Cruces, M. K. Janczur.....1

Effect of sublethal doses of the insecticide imidacloprid on adaptive traits of *Drosophila melanogaster*: Response to treatment over and after 15 consecutive generations

T. de F. Patarro, A. J. Manzato, L. Madi-Ravazzi, H. E. M. de Campos Bicudo.....8

A molecular, phylogenetic and functional study of the *dADAR* mRNA truncated isoform during *Drosophila* embryonic development reveals an editing-independent function

S. Ghosh, Y. Q. Wang, J. A. Cook, L. Chhiba, J. C. Vaughn.....20

Group rearing leads to long-term changes in locomotor activity of *Drosophila* males

A. A. Panova, J. V. Bragina, L. V. Danilenkova, N. G. Besedina, E. A. Kamysheva, S. A. Fedotov, N. G. Kamyshev.....31

A phylogenetic study of *Drosophila* splicing assembly chaperone RNP-4F associated U4-/U6-snRNA secondary structure

J. C. Vaughn, S. Ghosh, J. Chen.....36

Morphological abnormalities in *Drosophila* with overexpression of human APP gene

D. Rodin, O. Bolshakova, G. Kislik, S. Sarantseva.....49

The figure on the front cover is from the article published in Open Journal of Animal Sciences, 2013, Vol. 3, No. 4B, pp. 49-52 by Dmitry Rodin, Olga Bolshakova, Galina Kislik and Svetlana Sarantseva
