

## **Special Issue on Road and Bridge Engineering**

## **Call for Papers**

Road is produced with human activities. It promotes the progress and development of society. Road engineering refers to the whole process of planning, design, construction, maintenance and management of roads and the engineering entities they are engaged in. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Road and Bridge Engineering**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Road and Bridge Engineering**. Potential topics include, but are not limited to:

- Construction materials and technologies
- Road, railway and bridge repair
- Road and bridge information technologies
- Road infrastructure and its assessment
- Road and bridge construction financing
- Planning, design, and operations
- Low-volume roads
- Road traffic safety
- Road climatology
- Quality management and assurance

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue -** *Road and Bridge Engineering*" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 22nd, 2021
Publication Date	September 2021
