

Special Issue on Composite Interface and Damages

Call for Papers

Composite Interface and Damages is aiming at developing an appropriate modeling methodology for the simulation of intraluminal damage in laminated composites under complex loadings.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Composite Interface and Damages**. Potential topics include, but are not limited to:

- intraluminal damages
- stiffness reduction
- thermodynamic forces
- mechanics model
- experimental stiffness degradation
- identified parameters
- transverse stress effects

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Composite Interface and Damages**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 28th, 2017
Publication Date	August 2017
