

Special Issue on Forest Management Research

Call for Papers

Forest management is a branch of forestry concerned with the overall administrative, economic, legal and social aspects and with the essentially scientific and technical aspects, especially silviculture, protection, and forest regulation. This includes management for aesthetics, fish, recreation, urban values, water, wilderness, wildlife, wood products, forest genetic resources and other forest resource values. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **forest management research**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **forest management research**. In this special issue, potential topics include, but are not limited to:

- Wildlife considerations
- Forest health monitoring
- Forest sustainable management
- Forest planning
- Forest deforestation
- Forest evaluation
- Forest management model
- Forest economics
- National forest inventory
- Sustainable forest management

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Forest Management Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 19th, 2015
Publication Date	April 2015
