

Special Issue on Forestry Research

Call for Papers

Forestry is the science and craft of creating, managing, using, conserving, and repairing forests and associated resources to meet desired goals, needs, and values for human benefit. Forestry is an important economic segment in various industrial countries. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of forestry research.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **forestry research**. In this special issue, potential topics include, but are not limited to:

- Forestry development
- Forest conservation
- Forestry plans
- Urban forestry
- Forest ecosystems
- Plant diseases and insect pests
- Sustainable forestry

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Forestry Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 25th, 2016
Publication Date	October 2016
