

Special Issue on Forest Management

Call for Papers

Sustainable forest management, also known as sustainable forestry, is the practice of regulating forest resources to meet the needs of society and industry while preserving the forest's health. Therefore, sustainable forest management is always looking to strike a balance between the demand for the forest's natural resources and the vitality of the forest. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Forest Management**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Forest Management**. In this special issue, potential topics include, but are not limited to:

- Restoration & planted forests
- Reduced impact logging
- Forestry plans
- Forest fire management
- Forest law enforcement
- Plant diseases and insect pests
- Biodiversity & transboundary conservation
- Benefits of sustainable forest management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Forest Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	July 30th, 2019
Publication Date	September 2019
