

Table of Contents

Volume 3 Number 3

July 2015

Some New Results on the Number of Paths

B. S. El-Desouky, A. Mustafa, E. M. Mahmoud.....63

Predator Population Dynamics Involving Exponential Integral Function When Prey Follows Gompertz Model

A. T. Goshu, P. R. Koya.....70

Simulation of High Density Pedestrian Flow: A Microscopic Model

M. H. Dridi.....81

Modern *Ab-Initio* Calculations on Modified Tomas-Fermi-Dirac Theory

S. Seriy.....96

Stability Analysis of an SIR Epidemic Model with Non-Linear Incidence Rate and Treatment

O. Adebimpe, K. A. Bashiru, T. A. Ojurongbe.....104

Effective Control Strategies on the Transmission Dynamics of a Vector-Borne Disease

S. Hossain, J. Nayeem, C. Podder.....111

Phase-Field Modeling for the Three-Dimensional Space-Filling Structure of Metal Foam Materials

T. Uehara.....120

Analyzing Virtual World Region Fidelity on Scalability and Simulation Performance

S. C. Mondesire, J. Stevens, R. Leis, D. B. Maxwell.....126
