TABLE OF CONTENTS

Volume 3 Number 1

February 2013

Relativistic Schrödinger Wave Equation for Hydrogen Atom Using Factorization Method

M. R. Pahlavani, H. Rahbar, M. Ghezelbash.....1

Estimates of Tritium Produced Ratio in the Blanket of Fusion Reactors

M. Mahdavi, E. Asadi.....8

Search for Heavy Majorana Neutrinos at LHC Using Monte Carlo Simulation

H. M. M. Mansour, N. Bakhet.....12

Remote Quantum-Information Concentration: Reversal of Ancilla-Free Phase-Covariant Telecloning

X. W. Wang, S. Q. Tang.....18

The figure on the front cover is from the article published in *Open Journal of Microphysics*, 2013, Vol. 3, No. 1, pp. 12-17 by Hesham M. M. Mansour and Nady Bakhet.

Editor-in-Chief

Prof. Stefano Moretti

University of Southampton, UK

Open Journal of Microphysics (OJM) is an international journal dedicated to the latest advancement of microphysics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of microphysics.

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- Atomic physics
- Electronic physics
- Materials physics
- Molecular physics
- Nuclear physics
- Particle accelerator physics
- Particle cosmology
- Particle physics
- Quantum mechanics

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the **OJM**.

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
