

## Special Issue on Fractures and Related Disorders

### Call for Papers

Fracture is a continuous complete or partial fracture of the phalangeal structure, which is more common in children and the elderly. The causes of fractures fall into three main categories: direct violence, indirect violence, and cumulative strain. In fracture treatment, the three basic principles of reduction, fixation and functional exercise are very important. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Fractures and Related Disorders**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Fractures and Related Disorders**. Potential topics include, but are not limited to:

- Pathologic fracture & periprosthetic fracture
- Traumatic fracture & femoral fracture
- Foot and ankle related disorders
- Bone grafting
- Osteoporosis
- Complications
- Bone fracture
- Pelvic fracture & Hip fracture

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Fractures and Related Disorders**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 25th, 2020
Publication Date	August 2020

**Guest Editor:**
