

Special Issue on Clinical Orthopedics

Call for Papers

Orthopedics is a discipline which specializes in the anatomy, physiology and pathology of the skeletal and muscular system. With the development and progress of science and technology, great progress in diagnosis and treatment has been made in orthopedics. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Clinical Orthopedics.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Clinical Orthopedics**. Potential topics include, but are not limited to:

- Acetabular
- Arthritis
- Arthroplasty
- Back pain
- Bone formation
- Bone graft
- Chemonucleolysis
- Chondrosarcoma
- Cuff tear
- Foot and ankle
- Fractures
- Knee injuries
- Orthopaedic education
- Osteoarthritis
- Osteogenic sarcoma
- Osteomyelitis
- Scoliosis
- Shoulder
- Skeletal lesions
- Spinal injury
- Tendon
- Wrist

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Clinical Orthopedics***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 28th, 2022
Publication Date	August 2022
