# Special Issue on Applied Statistics

## Call for Papers

Applied Statistics includes planning for the collection of data, managing data, analyzing, interpreting and drawing conclusions from data, and identifying problems, solutions and opportunities using the analysis. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **applied statistics**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **applied statistics**. In this special issue, potential topics include, but are not limited to:

- Theory of statistical inference
- Data mining and multivariate statistical analysis
- Economic statistics and econometrics
- Statistics and economics
- Statistics and finance
- Statistics and sociology
- Statistics and physics
- Statistics and medicine
- Statistics and biology

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue - *Applied Statistics***" should be chosen during your submission.

According to the following timetable:

| Submission Deadline | December 29th, 2020 |
|---|---|
| Publication Date | February 2021 |
