

Special Issue on Statistics for Biology and Medicine

Call for Papers

Statistics is unavoidable in biology and medical research. It is due to the complexity of these areas involving large population, many factors related to outcome variables, measurement aspects, clustering, and other things that invite statistics to play its role in biology and medical sciences. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Statistics for Biology and Medicine**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Statistics for Biology and Medicine**. In this special issue, potential topics include, but are not limited to:

- Infectious disease modeling
- Big data in biology and medicine
- Clinical statistics
- Basic medical statistics
- Health statistics
- Statistical processes in pharmaceutical research
- Statistical concepts in biology and health sciences
- Applications in biology and medicine

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Statistics for Biology and Medicine**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 15th, 2022
Publication Date	May 2022
