## Special Issue on Social & Personality Psychology

### Call for Papers

Social & Personality Psychology delves into how individual personality traits interact with social environments to influence behaviors, thoughts, and emotions. It explores the vast spectrum of human emotions, interpersonal relationships, identity formation, and social influences, aiming to understand how personality shapes our interactions with the world and vice versa. This field bridges the gap between the deeply personal aspects of human nature and the broader societal contexts, offering insights into the complexity of human behavior in various social settings.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Social & Personality Psychology**. Potential topics include, but are not limited to:

- Social cognition
- Personality, attitudes, and behaviors
- Behavioral patterns
- Personality assessment
- Interpersonal relationships and group processes
- Personality processes and individual differences
- Personality development
- Emotion regulation and expression
- Personality traits and emotional intelligence
- Stereotyping, prejudice, and discrimination
- Self-concept and self-knowledge
