<http://www.scirp.org/journal/wjm>

World Journal of Mechanics (WJM) is an international peer-reviewed journal dedicated to presenting the English original research studies, reviews in the general field of mechanics including the mechanics of solids, structures and fluids and their interaction.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Aeroelasticity
- Classical and Quantum Aspects of Mechanics
- Control Theory
- Dynamics and Vibration Control
- Elasticity and Plasticity
- Flow-Induced Vibration and Instability
- Fluid Mechanics and Aerodynamics
- Fluid-Structure Interaction (Steady and Unsteady)
- Mechanics of Materials
- Mechanism and Mechanics
- Microfluidics
- Multi-Scale Mechanics
- Nanomechanics
- Quantum Mechanics
- Statistical Mechanics
- Thin Film Mechanics
- Viscoelasticity

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of World Journal of Mechanics.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
