Special Issue on

Rotational Dynamics: Theory of Dynamic Interactions

Call for Papers

The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of rotational dynamics: theory of dynamic interactions.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **rotational dynamics: theory of dynamic interactions**. Potential topics include, but are not limited to:

- Theory of dynamic interactions (tdi)
- History of advanced dynamics
- Euler equations
- Theory of dynamic interactions innovations
- Technological applications of the tdi
- Consistency with the other laws of physics

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue –*Rotational Dynamics: Theory of Dynamic Interactions***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 28th, 2016
Publication Date	March 2017

Guest Editor:
Prof. Julio Cano, Advanced Dynamics CB., Madrid, Spain
